

Action-Driven Exceptional Leaders

Train a staff member to become
a local expert to deliver your own professional development and build an effective
culture in your school!

Action-Driven Education's Exceptional Leaders program is designed to share insight on developing a barrier-moving culture in your school. Through resource sharing, collaboration with other exceptional leaders, and mentorship, participants will acquire proactive strategies to share in their school. Participants will develop a healthy, action-driven perspective on how effective pre-referral and special education programs should operate. Throughout the program, leaders will explore our unique Barrier-Moving Mindset® as a means of developing effective programs for children with special needs.

Participants will receive access to our members-only website, which includes:

- All copyrighted PowerPoint presentations, videos, blog articles, and newsletter content to be used freely in your school.
- Access to our asynchronous courses to review and use the content as desired
- Our [five-part action plan](#), including all the resources you need to make the plan work in your school
- A training sequence connected to ready-to-use resources - let's not reinvent the wheel!
- Links to participate in our monthly action-driven collaboration sessions and recordings of previous sessions!
- Opportunities to request to focus on additional training topics of interest to you
- A link to schedule individualized train-the-trainer sessions to plan for your local professional development
- Direct access to our ADE team via email and phone with a 24-hour response time - ask all the questions you want!

Threads of conversation:

- Accomods® best practices - empower a child around their needs
- Developing effective pull-out instruction, inclusion, and coteaching instruction to improve skills - work a child through their needs
- Engaging approaches to professional development
- Building a barrier-moving culture in your classroom and school
- Enhancing the effectiveness of special education through simple practices - let's not make things so complex
- Developing a healthy and supportive administrative culture
- Empowering engaged general education teachers and resourceful special education teachers
- How common sense data collection prevents wasted time by validating the effect of effort
